**MIN ORDER 4 SHEETS PER GANG**

If minimum order quantity is not met, there will be a \$25 setup fee.

All artwork must be 300 resolution transparent png file. If sending vector graphics, all text must be outlined. We will accept .ai and .eps vector files. Do not mirror your artwork. If you do they will be printed in reverse. Depending on the size of the order it will be either cut down into 11x13 sheets ( or smaller ) or it will be sent as a roll in a tube to avoid excessive handling and damage. Gang your files to the 21.5"w x 11"h size, meaning you can have multiple images on one sheet. **FILL THE SHEET!**

DTF can be applied on a wide range of materials including, cotton, nylon, treated leather, polyester, 50/50 blends and more (light and dark fabrics).

We use **HOT** Peel film unless otherwise stated. You must be able to control pressure and heat settings. Please see our application flyer for pressing instructions.

We will try to have a 1-3 business day (excluding holidays & weekends) turn-around time on your order. In some cases it may take longer depending on our workload at the time or scheduled company holiday closures. Larger orders may take up to 5 business days. Please join JBN Promotions on Facebook for any company holiday closures or delays.

### **IMPORTANT:**

**Return Policy:** We are unable to offer returns or exchanges as all items are printed as orders come in with your special artwork. Please read all instructions before pressing. We do not take responsibility for Images that are sent with improper quality, edge pixelation, spelling mistakes or improper coloring or knockouts.

**Colors:** We are not responsible for colors. You must check your colors -- we do not match colors and we do not check colors for you. Please check your pantone colors as what you see on the screen is not necessarily what will print. CMYK files are best with Black or Greys a % of K.

**Small, Fine Print:** Words less than 0.35 inches will not come out well and will most likely not transfer onto the garment. Fine, tiny details will not adhere to the transfer. Be sure to add a stroke and make any fine details thicker for best results. Outline your fonts.

**Transparency effects:** Transparency, see through effects and drop shadows do not work for DTF. Please take off any shadow or edge gradient effects as it will not print as you see on the screen. If its white on your copy, it will be white when printing. .

**Resolution:** Artwork needs to be created in 300 DPI for best print quality. Images with lower quality will not print well. The printing process needs a high quality image to have a clean and crisp image. Check your edge quality and watch out for pixilated images.

**Copyrights:** We will not print any copyrighted, trademarked or vulgar designs. Please only send designs you own the copyright to.
